

**50/60 Hz**

**ErP  
ready  
2015**

Tomorrow's high efficiency ready now: the new Lowara Ecocirc® are compliant with the ErP-Directive for 2015

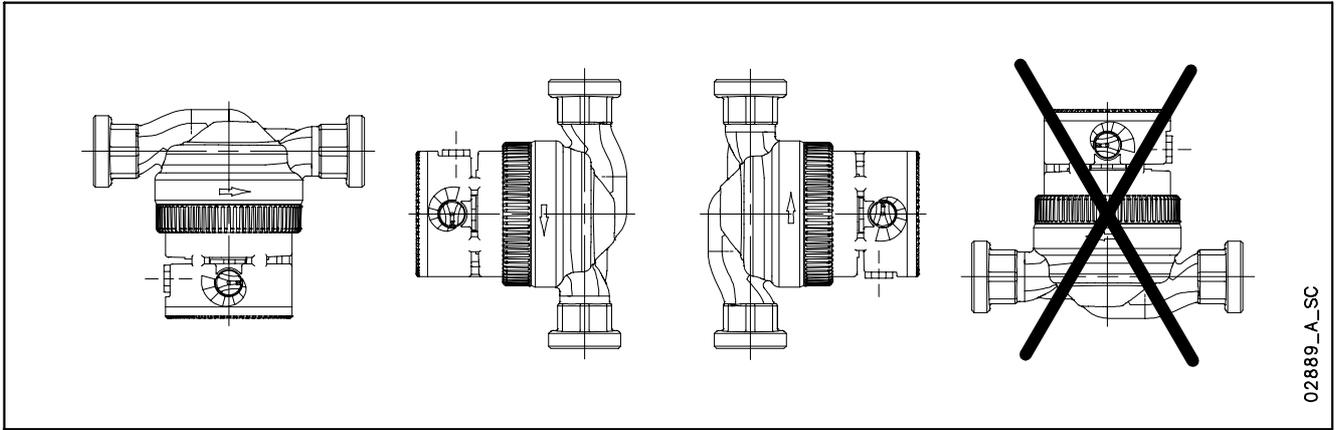

## ECOCIRC® Series

HIGH EFFICIENCY CIRCULATORS  
FOR DOMESTIC HEATING

Cod. 191007551 Rev.A Ed.10/2012

 **LOWARA**  
a xylem brand

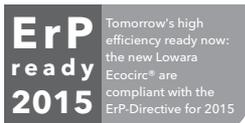

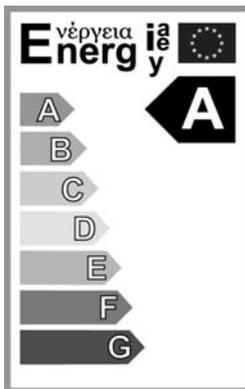

**Ecocirc® SERIES  
INSTALLATION POSITIONS**

02889\_A\_SC

## High efficiency circulators for domestic heating

### Ecocirc® Series

### MARKET SECTORS

RESIDENTIAL.

### APPLICATIONS

- Water circulation in heating and air conditioning systems.
- Refurbishment or extension of existing systems.
- Recommended for facilities fitted with thermostatic valves.
- Single-family houses or apartment buildings.
- Floor heating systems.

### SPECIFICATIONS

#### PUMP

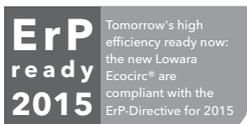

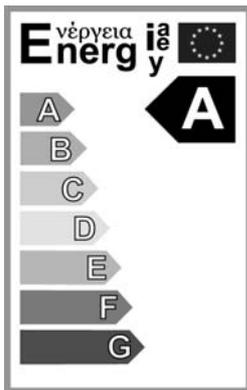

- **Flow rate:** up to 3,2 m<sup>3</sup>/h.
- **Head:** up to 5,7 m.
- **Maximum power consumption:** 23 W (for the 4 m model) and 42 W (for the 6 m model).
- **Temperature of pumped liquid:** -10°C ÷ +110°C.  
Non-freezing, non-condensing.  
Maximum 20% glycol and water mixture.  
For glycol quantities higher than 20%, hydraulic performances must be checked.
- **Maximum operating pressure:** 10 bar (PN 10).
- **Rotor assembly group:** made of stainless steel/composite material/carbon.

#### MOTOR

- Permanent magnet EC (Electronically Commutated) type motor with spherical rotor/stator.
- Wet rotor with a single spherical ceramic/carbon bearing.
- Integrated motor protection; no external protection required.
- Single-phase 220-240 V, 50-60 Hz power supply.
- Variable-speed motor, with automatic speed adjustment based on system requirement.
- **Insulation class:** F (155°C).
- **Protection class:** IP 44.

## High efficiency circulators for domestic heating

### Ecocirc® Series

### SERIES CHARACTERISTICS

- **Improved hydraulics to improved efficiency:** The very latest computer simulations have further optimized the pump housing and the impeller. The cast iron pump housing is cathaphoresis coated completely and is therefore resistant to corrosion.
- **The spherical rotor.** The permanent magnet rotor/impeller unit is the only moving part. Spherical motor pumps are shaftless, and therefore whisper quiet over the whole lifetime. In case of an indicated rotor blocking, emergency software shakes and vibrates the rotor to avoid further blocking.
- The revolutionary **Anti-Block-Technology** allows to separate the magnetic chamber from the flow, preventing magnetite and sludge to block and damage the pump. Blocking up, even in very old, open systems is impossible by our pump design.
- Easy to control, **Two in one control:** Step-less manually control with constant speed, displayed by a white LED, or alternatively automatic differential pressure, displayed by a blue LED.
- **Optimized motor technology:** Doubled electric windings combined with the latest 32 Bit processor technology - that also makes the Ecocirc® even more efficient.
- **Overtemperature protection feature** that slows down the circulator in case the temperature of the electronic module is too high and shuts it down when temperature rises above the safety limit. The circulator will automatically restart after having cooled down.
- Always **easy to access:** The screw ring design results in a pump motor that can be rotated in any position around the 360°circle. The electrical connection as well as the control knob is therefore easy to access.
- 3-core **pre-mounted cable** for main power supply single-phase 230 V / 50 Hz, 2 m lenght.
- **Automatic air purge:** Quick automatic air-venting-mode for a safe operation.

### ADVANTAGES

- Energy saving.
- Blockage free.
- Minimal maintenance.
- Easy and quick installation.
- Noise reduction.

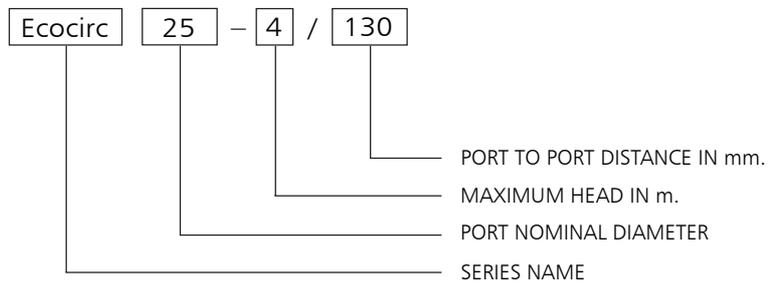

### INSTALLATION

- Suitable for installation in vertical or horizontal piping, in this last case not with the motor housing upward.

### CONTROL MODES

- Automatic regulation: the pump automatically adjusts the working conditions based on the requirement of the system. When the pump detects a decrease in the flow, the inverter reduces the differential pressure of the pump until it reaches the required head.

## Ecocirc® SERIES IDENTIFICATION CODE

EXAMPLE : Ecocirc 25-4/130

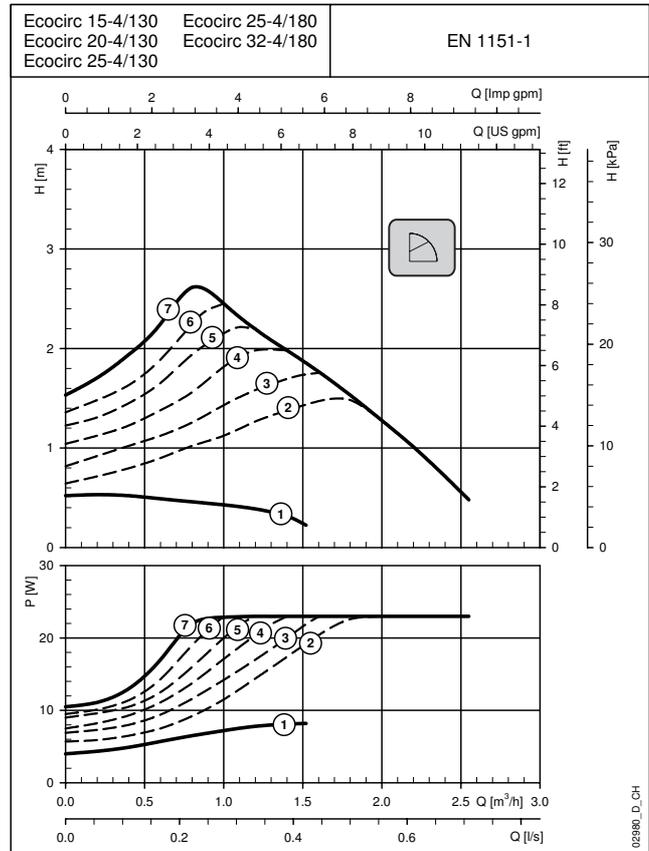

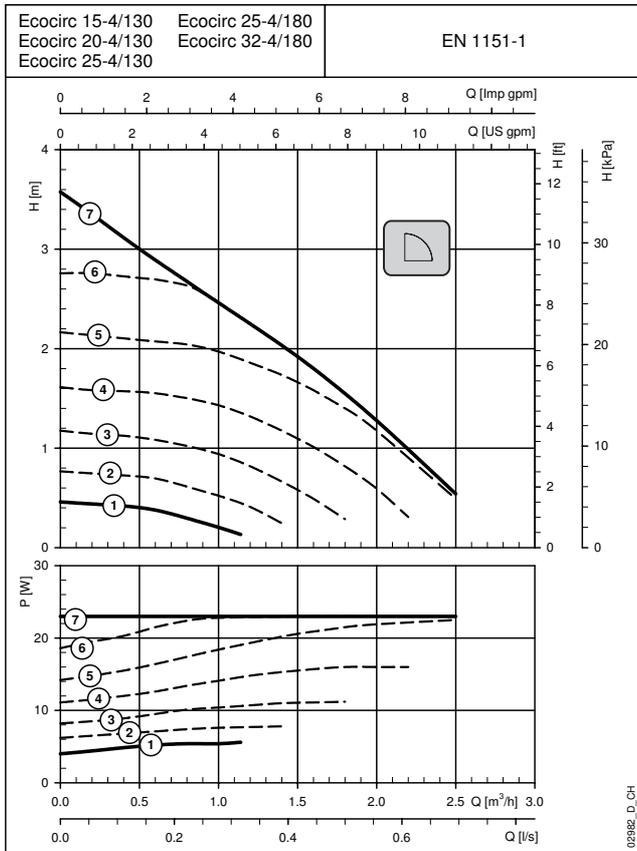

A class electronic circulator, of the Ecocirc series, ErP 2015 compliant, port nominal diameter = 25, max head = 4 m, with port to port distance 130 mm.

## TABLE OF MATERIALS

PART	MATERIAL
Pump body	Cast iron ( EN-GJL-200 ) cataphoretically coated
Rotor assembly group	Stainless steel
	Composite material
	Carbon
Bearing	Ceramics
Gaskets	EPDM Rubber
Motor housing	Aluminum ( AlSi11Cu2 )
Screw ring	Aluminum ( AlMgSi05 )

ecocirc-50-en\_a\_tm

## Ecocirc...4/ SERIES SINGLE-PHASE OPERATING CHARACTERISTICS

These performances are valid for liquids with density  $\rho = 1.0 \text{ Kg/dm}^3$  and kinematic viscosity  $\nu = 1 \text{ mm}^2/\text{sec}$ .  
Pump operates steplessly. Lines correspond to knob settings and are for reference only.

G-at-pct\_a\_th

hr = flow resistance for 100m of straight pipeline (m)  
V = water speed (m/s)

## FLOW RESISTANCE

### TABLE OF FLOW RESISTANCE IN BENDS, VALVES AND GATES

The flow resistance is calculated using the equivalent pipeline length method according to the table below:

ACCESSORY TYPE	DN											
	25	32	40	50	65	80	100	125	150	200	250	300
	Equivalent pipeline length (m)											
45° bend	0,2	0,2	0,4	0,4	0,6	0,6	0,9	1,1	1,5	1,9	2,4	2,8
90° bend	0,4	0,6	0,9	1,1	1,3	1,5	2,1	2,6	3,0	3,9	4,7	5,8
90° smooth bend	0,4	0,4	0,4	0,6	0,9	1,1	1,3	1,7	1,9	2,8	3,4	3,9
Union tee or cross	1,1	1,3	1,7	2,1	2,6	3,2	4,3	5,3	6,4	7,5	10,7	12,8
Gate	-	-	-	0,2	0,2	0,2	0,4	0,4	0,6	0,9	1,1	1,3
Non return valve	1,1	1,5	1,9	2,4	3,0	3,4	4,7	5,9	7,4	9,6	11,8	13,9

G-a-pcv\_a\_th

The table is valid for the Hazen Williams coefficient  $C = 100$  (cast iron pipework). For steel pipework, multiply the values by 1.41. For stainless steel, copper and coated cast iron pipework, multiply the values by 1.85.

When the **equivalent pipeline length** has been determined, the flow resistance is obtained from the table of flow resistance.

The values given are guideline values which are bound to vary slightly according to the model, especially for gate valves and non-return valves, for which it is a good idea to check the values supplied by the manufacturers.

## FURTHER PRODUCT SELECTION AND DOCUMENTATION

### Xylect

Xylect is pump solution selection software with an extensive online database of product information across the entire Lowara, and Vogel range of pumps and related products, with multiple search options and helpful project management facilities. The system holds up-to-date product information on thousands of products and accessories.

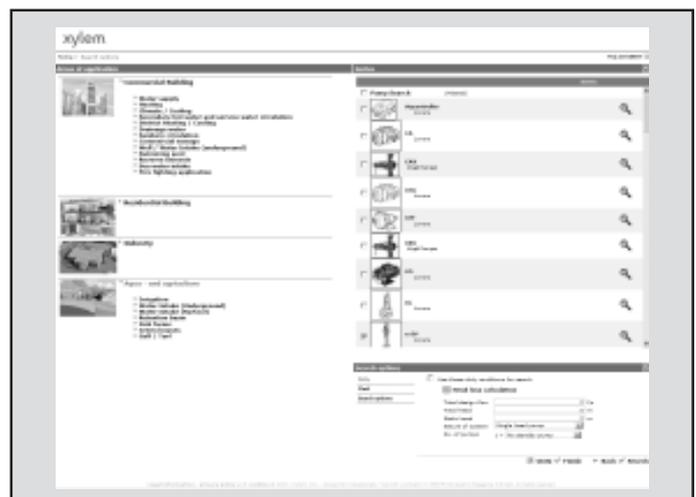

The possibility to search by applications and the detailed information output given makes it easy to make the optimal selection without having detailed knowledge about the Lowara and Vogel products.

The search can be made by:

- Application
- Product type
- Duty point

Xylect gives a detailed output:

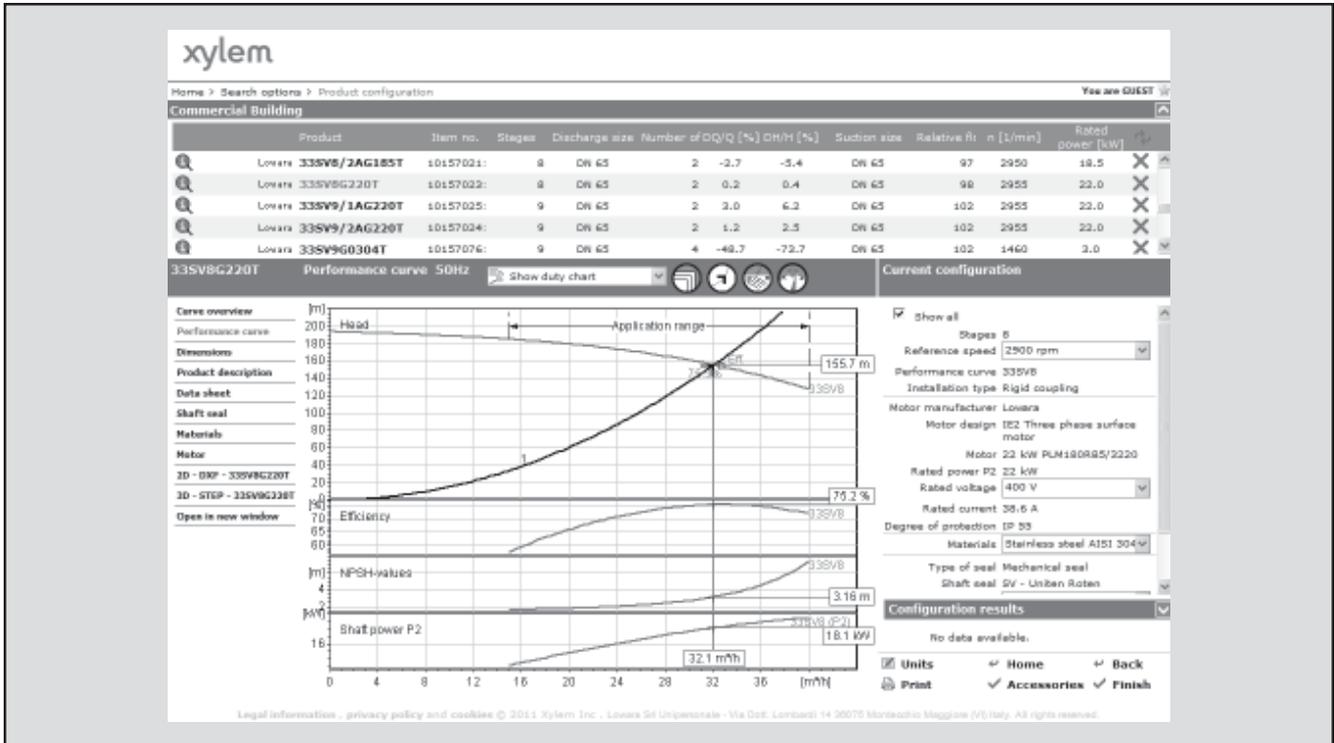

- List with search results
- Performance curves (flow, head, power, efficiency, NPSH)
- Motor data
- Dimensional drawings
- Options
- Data sheet printouts
- Document downloads incl dxf files

*The search by application guides users not familiar with the product range to the right choice.*

## FURTHER PRODUCT SELECTION AND DOCUMENTATION

### Xylect

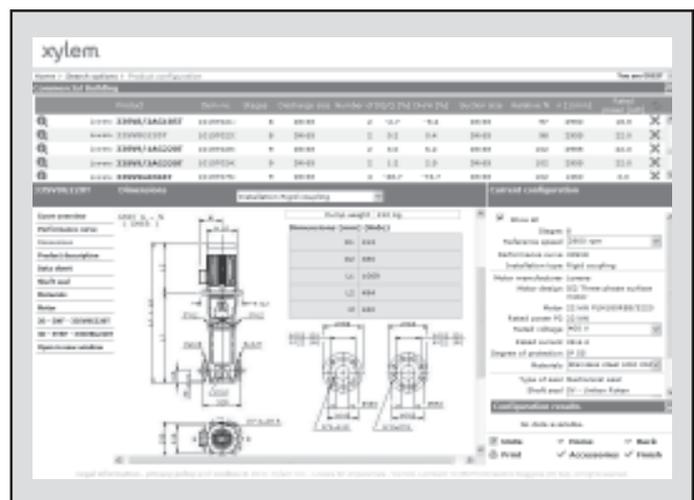

The detailed output makes it easy to select the optimal pump from the given alternatives.

The best way to work with Xylect is to create a personal account. This makes it possible to:

- Set own standard units
- Create and save projects
- Share projects with other Xylect users

Every user has a My Xylect space, where all projects are saved.

For more information about Xylect please contact our sales network or visit [www.xylect.com](http://www.xylect.com).

Dimensional drawings appear on the screen and can be downloaded in dxf format.

# Xylem |'zīləm|

- 1) The tissue in plants that brings water upward from the roots;
- 2) a leading global water technology company.

We're 12,000 people unified in a common purpose: creating innovative solutions to meet our world's water needs. Developing new technologies that will improve the way water is used, conserved, and re-used in the future is central to our work. We move, treat, analyze, and return water to the environment, and we help people use water efficiently, in their homes, buildings, factories and farms. In more than 150 countries, we have strong, long-standing relationships with customers who know us for our powerful combination of leading product brands and applications expertise, backed by a legacy of innovation.
