

Control features include FLOWADAPT, which reduces the need for throttling valves, thus cutting costs on system components.

MAGNA3 is the superior choice for a wide range of heating and cooling applications, including:

Mixing loops Heating surfaces Air conditioning surfaces Ground-source heat pump systems Smaller chiller applications.

MAGNA3 is a single-phase pump and characterised by having the controller and control display integrated in the control box. The pump also has a built-in differential-pressure and temperature sensor.

The pump housing is available in both cast-iron and stainless-steel versions. The composite rotor can is carbon-fibre reinforced, the bearing plate and rotor cladding are made of stainless steel and the stator housing is made of aluminium. The power electronics are air-cooled.

MAGNA3 incorporates a 4-pole synchronous, permanent-magnet motor (PM motor). This motor type is characterised by higher efficiency than a conventional asynchronous squirrel-cage motor. The pump speed is controlled by an integrated frequency converter.

Features:

•	Vast communication options, including inputs, relays and fieldbus The most energy-efficient pump range within the industry
	Intelligent control functions
	Stainless-steel variant to accommodate domestic hot-water applications AutoAdapt
	FlowAdapt, which reduces the need for throttling valves, cutting costs on system components
	Proportional-pressure control
	Constant-pressure control
	Constant-temperature control
	Constant-flow control
	Differential-temperature control (requires an additional temperature sensor)
	Constant-curve duty
	Maximum and minimum curve duty
	Automatic night setback
	Heat energy monitor
	No external motor protection required

Company name: Anchor Pumps Company Limited Created by: Phone:

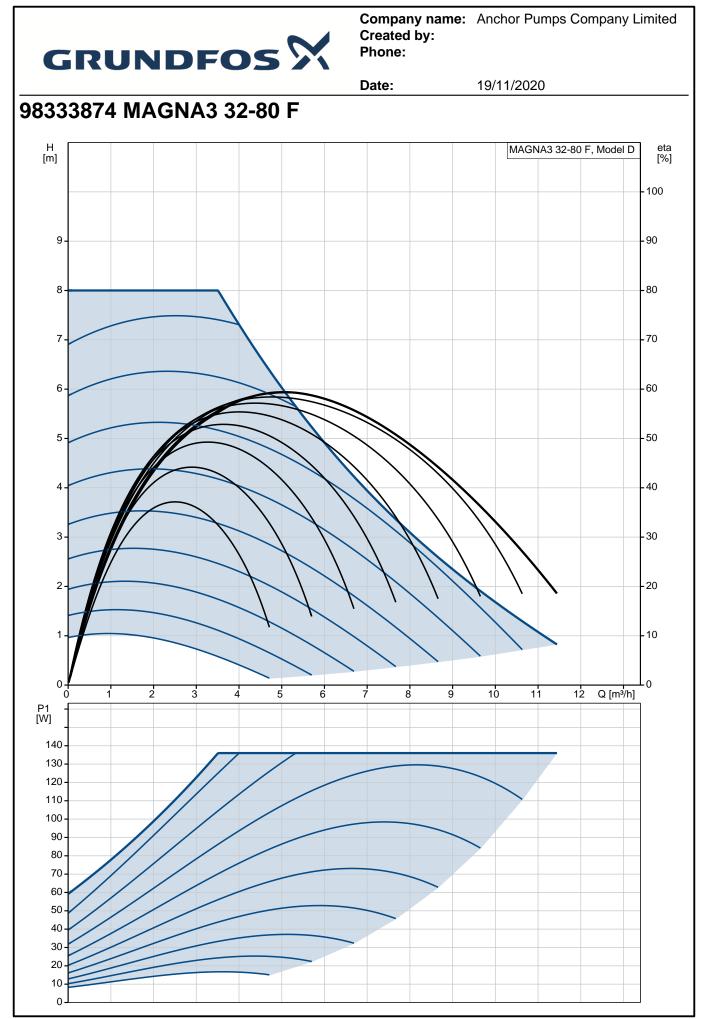

Date:

Large temperature range due to air-cooled electronics.

19/11/2020

Innovative clamp ring with only one screw enabling easy repositioning of the pump head

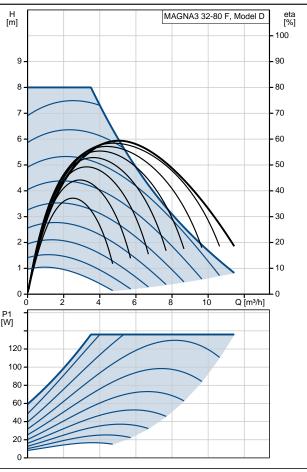

Insulating shells supplied with single-head pumps for heating systems
