	Product No.: 97924297	
	The Grundfos MAGNA3 circulator pump is the ideal choice for almost any building project – old or new unrivalled energy efficiency, all-encompassing range and built-in communication capabilities, MAGNA engineers and specifiers looking to create high-performance heating and cooling systems.	3 is ideal for
	The pump is maintenance-free due to the canned-rotor type design. This also means that pump and n integral unit without shaft seal and with only two gaskets for sealing. The bearings are lubricated by th liquid.	e pumped
	MAGNA3 features an intuitive display and allows you to connect wirelessly with the Grundfos GO Ren giving you access to advanced reporting and monitoring.	
	The pump includes fieldbus communication via CIM modules as well analog and digital inputs and cor relays.	ifigurable
	Control features include FLOWADAPT, which reduces the need for throttling valves, thus cutting cost components.	s on system
	MAGNA3 is the superior choice for a wide range of heating and cooling applications, including:	
	Mixing loops Heating surfaces	
	Air conditioning surfaces	
	Ground-source heat pump systems Smaller chiller applications.	
	MAGNA3 is a single-phase pump and characterised by having the controller and control display integration control box. The pump also has a built-in differential-pressure and temperature sensor.	
	The pump housing is available in both cast-iron and stainless-steel versions. The composite rotor can carbon-fibre reinforced, the bearing plate and rotor cladding are made of stainless steel and the stator made of aluminium. The power electronics are air-cooled.	is housing is
	MAGNA3 incorporates a 4-pole synchronous, permanent-magnet motor (PM motor). This motor type i characterised by higher efficiency than a conventional asynchronous squirrel-cage motor. The pump s controlled by an integrated frequency converter.	s peed is
	Features: • Vast communication options, including inputs, relays and fieldhus	
	Vast communication options, including inputs, relays and fieldbus The most energy-efficient pump range within the industry	
	Intelligent control functions	
	Stainless-steel variant to accommodate domestic hot-water application	ons
	AutoAdapt FlowAdapt, which reduces the need for throttling valves, cutting cost components	s on system
	Proportional-pressure control	
	Constant-pressure control	
	Constant-temperature control	
	Constant-flow control Differential-temperature control (requires an additional temperature s	ensor)
	Constant-curve duty	
	Maximum and minimum curve duty	
	Automatic night setback	
	Heat energy monitor No external motor protection required
