

Max™ & UltraMax™ Series

Toughest high-pressure applications

Features

- Suitable for many high-pressure applications
- Super thick steel construction
- Patented stainless steel water connection
- Virgin polypropylene liner
- Dual layer polyurethane paint finish
- Leak-free O-ring sealed air valve
- High-grade butyl diaphragm
- Available in 16 bar and 25 bar maximum pressure
- Replaceable tank base
- Comprehensive testing
- Maintenance-free

Certifications may vary by model. Check with your GWS sales representative for more detailed information.

Featuring the same high-quality, zero-maintenance design as our PressureWave™ series, Max™ and UltraMax™ tanks are built with thicker gauge steel to handle the toughest high-pressure applications.

From skyscrapers, high-rise commercial and residential properties, to large-scale irrigation and industrial systems, Max and UltraMax tanks are the #1 choice of engineers, designers, consultants, and specifiers the world over.

No matter the application, whether it's high-pressure water supply, high-pressure flushing, pressure regulation in fire pump and sprinkler systems or protection against pressure surges caused by hydraulic shock and water hammer, industry experts agree that Max and UltraMax tanks are the best solution whenever high-pressure tanks are required.

Construction of Max™ and UltraMax™ tank

1. Leak free, O-ring sealed air valve cap
2. High grade butyl diaphragm design
3. Dual layer polyurethane paint finish
4. Virgin polypropylene liner
5. Patented stainless steel water connection
